

For my midterm project I will go through the process of making a film. The first picture will be of a script to show that in order to have a film most of the time you will need a script to go off of. Then I will show a storyboard kind of drawing out the film and showing some shots in it. Then I will probably show getting funds in some manner with either an envelope of money because a budget is a good thing to have. After that I will probably show an image of a camera because you need one to have a movie. Then I will show more gear like audio equipment to show sound. Then lights to show lighting needed as in this part I am just showing getting the equipment. After that I will probably show people as a way to show getting the actors for a film. After that I will probably show a slate board to show the filming has begun. Next in line I will probably show a set or a green screen to continue the filming. To continue the process I will show a computer to symbolize editing. Then I will show a movie theater to show it being complete and watchable. And to finish it all off I will show the oscars or something to show getting awards for the film.
